

LINE MAINTENANCE CAPABILITIES

Airline Maintenance Service, Inc

On Call Service

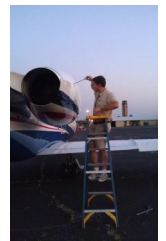

Line maintenance for air carriers is the heart of what Airline Maintenance Service, Inc. does. It's where we started and it's what we are passionate about. Providing "On Call" service to airliners filled with anxious passengers and crew can be daunting and stressful. We understand the importance of that task and we do it well.

Airline Maintenance Service, Inc. is currently providing on call line maintenance to air carriers at the Nashville International Airport in Tennessee and at the Tupelo Regional Airport in Mississippi. Our technicians understand the importance of providing timely efficient service. AMS crews work in any weather out on the ramp year round. They are not daunted by any conditions.

At Airline Maintenance Service, Inc. we have the equipment and personnel capable of providing on call line maintenance for all airlines. Our technicians are airline trained on most of the common airframes including regional jets. All technicians are part of an FAA certified drug testing program and have undergone extensive FBI background checks. All are badged at the airports we operate from.

Parts Management

We have located our parts warehouse in the Air Cargo Building for convenience. Our ability to quickly identify, source and procure parts for our customers aircraft is paramount to our success. Additionally, we are capable of managing inventory for our customers. We currently store customer parts in segregated and secured space that is climate controlled.
