

SCHEDULED MAINTENANCE CAPABILITIES

Airline Maintenance Service, Inc

Overnight Services

Airline Maintenance Service, Inc. has the experience and training to provide air carriers with quality on time scheduled overnight maintenance. We are doing it right now for your competition! Our focus and dedication to quality can help your airline decrease maintenance costs while increasing maintenance efficiency.

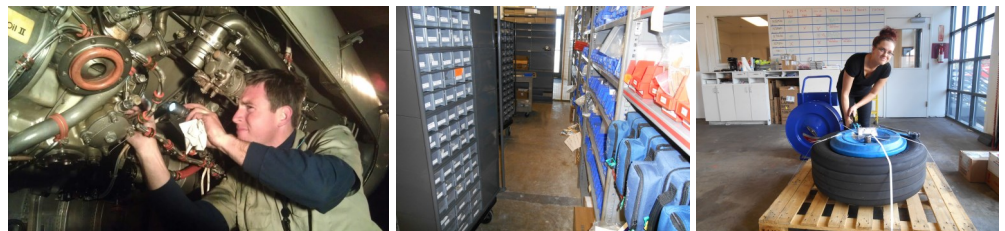

Airline Maintenance Service, Inc. is currently providing scheduled overnight maintenance to air carriers at the Nashville International Airport in Tennessee. Our technicians understand the time constraints of overnight maintenance. Kickoff delays are unacceptable. Our customers aircraft must be completed on time with all maintenance log entries completed an hour before departure. Our crew chiefs know how to allocate resources.

AMS crews work in all weather conditions out on the ramp year round. There is no cozy heated hangar at our operation. Our technicians are not daunted by any conditions. We hire only those that relish the opportunity to perform under pressure in adverse conditions. They wear it as a badge of honor!

Parts Management

Overnight Scheduled Maintenance demands parts availability 24/7. At Airline Maintenance Service, Inc. we have the facilities and personnel capable of managing your inventory of commonly used parts. Our parts technicians are airline trained and all are certified hazmat shippers. Our climate controlled warehouse is segregated by customer and each area is separately secured.

We have located our parts warehouse in Air Cargo Building for convenience. Our ability to quickly identify, source and procure parts for our customers aircraft is paramount to our success.
